

Farizon SuperVAN

Van-tastic Space, Powering Business

WEALTH

Win Space, Win Time, Win Profit

Larger cargo space
Maximum charging speed 2.4C, maximum payload
1.3-1.48T
More load, more profit

INTELLIGENCE

Intelligent Vehicle

30 intelligent safety
configurations

STRENGTH

Super Safety, Strong Reliability

over 70% high-strength steel in body composition
2.8 million km extremely-condition road test
challenges

Large Space

The Farizon GX4-M drive-by-wire architecture eliminates the mechanical hard connections between the vehicle body and chassis, providing SuperVAN outstanding space utilization capability. With dimensions of 5490mmx1980mmx2500mm, SuperVAN acquires a larger interior space. The outstanding trunk space ensures proper placement of cargo.

Driving Assistance

Equipped with ADAS configuration: with a range of intelligent driving assistance and safety features, including ACC, ICC, LCA, AEB, DOW, and more. These features can monitor driving and road conditions in real-time, enhancing active safety, improving the driving experience.

Strong Vehicle Body Meets European Safety Standard

The Farizon SuperVAN features a cage structure, with over 70% of high-strength in body composition, a maximum torsional stiffness of -38000 N.m/m², a maximum roof pressure resistance of -45000N, and a maximum towing capacity of -2000kg. Additionally, the robust aluminum profile electric box automatically cuts off high-voltage power after a collision, unlocks the doors, and activates hazard lights.

Satisfy Multi-scenario Needs

With the ability to customize the range to meet specific usage scenarios, users can maximize their economic benefits.
